

Furlong

Versatile School
Management Software

Unlock unlimited
potential with software
from **Furlong.**

More than 20 years of helping schools thrive.

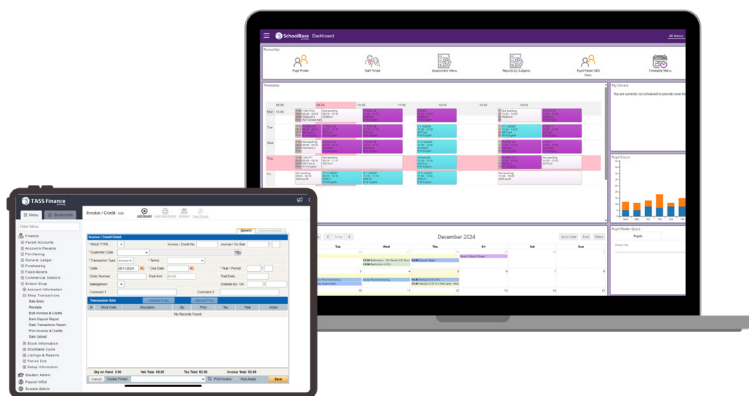

We deliver **flexible, customisable solutions** tailored to our clients' needs.

Starting with SchoolBase as an admissions tool, Furlong has grown into a comprehensive, **feature-rich portfolio**. Our growth, driven mostly by referrals, reflects the **quality of our solutions and support**.

In 2017, Furlong was acquired by a parent company, software experts Volaris. However, we continue to operate as a truly independent business. This means the best of both worlds for our clients who know we have the **stability required to ensure longevity**, along with the **flexibility and ongoing customer support** they deserve.

Alongside **SchoolBase**, we also offer **FeeMaster** (an invoicing platform), **TASS Finance** (a complete school accounting solution) and **Maestro** (a music lesson scheduling tool) to help schools manage all tasks.

We take a customer-centric approach, partnering closely with your school to provide genuine support for your staff, students, and parents. Choose Furlong for a company that truly cares.

“Everyone at Furlong is always professional, and nothing is ever too much trouble. The team is responsive, knowledgeable, and quick to find solutions to queries, even when the answer isn’t immediately available. We are very happy with our decision to use Furlong software and look forward to expanding our usage in the future.” **St. Joseph’s College**

“Our experience with SchoolBase has been entirely positive. Everyone we have dealt with has been genuinely helpful and supportive. The team is always keen to help us maximise the system’s potential. I would highly recommend Furlong.” **Secure and Specialist Education**

“The ability to make multiple edits simultaneously is unique among MIS solutions and a great example of how SchoolBase helps reduce administrative workload. I can honestly say that SchoolBase is the best MIS I have seen in a long time!” **Sevenoaks Preparatory School**

Trusted by schools around the world.

An MIS as Unique as Your School

SchoolBase is a highly flexible and simple-to-use MIS. Streamlining everything from admissions to alumni support, the platform keeps student data secure, enables communications, and integrates with a selection of third-party providers.

Are you frustrated by MIS limitations? Upgrade to SchoolBase to unlock seamless experience for students, staff, and parents.

Tools to improve student outcomes.

Fully customisable.

Cloud-based and security protected.

A Finance System Designed Exclusively for Independent Schools

TASS Finance is a double-entry accounting system designed exclusively for independent schools.

The software streamlines school accounting by addressing common challenges such as debt chasing, student billing, and staff purchase requisitions—all within a single, unified system.

Complete financial management in one tool.

Unique features like staff requisitions and parent debtors.

Real-time insights for budget planning.

Flexible Invoicing Software for Schools

Schools rely on an MIS for administration, and accounting software for finances, yet neither specialises in invoicing. The solution? **FeeMaster**—a versatile bridge between the two.

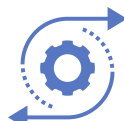

Compatible with any MIS and accounting package, including Sage and Xero, FeeMaster simplifies billing, VAT management, and custom styling. This intuitive tool empowers finance teams to take full control of school fees.

Connect MIS with accounting software.

Create, edit, send and track student fee invoices.

Manage evolving demands like VAT.

School Music Management Software for Conducting Success

Streamline the management of music lessons, ensembles, and exams with our **Maestro** software.

By connecting pupils, parents, VMTs, and staff, Maestro enhances efficiency for everyone. Fully integrable with our MIS (SchoolBase) or available as a standalone solution, it ensures creative lessons run smoothly and without disruption.

Manage students, staff and resources.

App for staff and peripatetic teachers.

Send communications and reports.

Support and services any school can rely on.

Trusted Support

We work closely with schools to provide a personalised, hands-on experience from day one.

With rapid, tailored support, our global team acts as an extension of your staff, ensuring smooth operations. Whether sharing resources or solving problems, we're always here to make life easier.

Unlock your school's full potential with Furlong's professional services

We ensure seamless integration with your data and processes, backed by our expert Professional Services team.

From training and customisations to module enhancements and reporting, we provide tailored support. With PS hours included in your contract and additional hours available, we're always here to help you maximise Furlong software.
